

## LIST OF MUSIC OR VIDEO LICENSING SERVICES

### *CCLI Licensing*

Christian Copyright Licensing International: Serves churches and organizations by providing access to worship tools, such as sheet music, chords and lead vocals, that are copyrighted. With a CCLI License, your church can be legally covered for: storing lyrics, printing songs, recording worship services, making custom musical arrangements, projecting/displaying lyrics and translating songs. Visit [CCLI.com](http://CCLI.com) to learn more.

### *CVLI Licensing*

Hoping to play a clip from that DVD for your sermon illustration? Think again. Most movies that live in a home theater library are licensed for private, at-home viewing only. With CVLI, churches can stream from a few minutes up to a feature-length film, depending on the license. Not all movies are covered. Visit [CVLI.com](http://CVLI.com) to learn more.

### *SongSelect*

SongSelect by CCLI pulls from the licensing entity's database of legally covered songs and provides worship tools to put those songs to use. Learn more at [CCLI.com/songselect](http://CCLI.com/songselect).

### *ScreenVue*

With a CVLI License, search the ScreenVue database to download copyrighted movie clips. The clips are legally covered by the CVLI License.
